

## Priority actions

### Priority 1

To support and facilitate systems thinking to enable the development of innovative approaches to improve health and wellbeing outcomes

### Priority 2

To support the understanding of, and utilise, place-based responses to improve the health and wellbeing of communities

### Priority 3

To advocate for consumer participation, and collaboration with communities to foster a culture of action and innovation

### Priority 4

To support and embed shared measurement, monitoring and evaluation for the development of meaningful outcomes data

## UHPCP role and practice approaches

- Collaboration
- Innovation
- Participatory approaches
- Facilitation
- Planning
- Capacity building
- Advocacy
- Embedding frameworks
  - Social Determinants of Health
  - Place based
  - Systems thinking

### Principles of UHPCP

- Access and equity
- Strong leadership and governance
- Accountability and transparency
- Collaboration and partnership
- Evidence based
- Person centred
- Sustainability

### Networks and alliances

- Family violence networks (Ovens Murray and local)
- Murray Consortium
- Indigo Consortium
- COPD steering and operational committees
- Ovens Murray Chronic Care Steering Committee
- Area and state-wide Primary Care Partnership networks

### Other networks and alliances as identified

## Priority initiatives

### Prevention

- Smoking cessation
- RESPOND research project support

### Family violence

- Catchment-wide community responses
- Strengthening Hospital Responses to Family Violence funded HS
- Local government

### Organisational Health Literacy

- Continue to build understanding and capacity to address across the catchment.

### Implementation of Ovens Murray Chronic Care Strategy

- Support the socialisation of the Chronic Care Strategy.
- Provide secretariat support and guidance to the Ovens Murray implementation group.
- Build understanding and responses based in systems thinking (e.g. Conditions of Systems Change).
- COPD project development

### Resilience

- Drought Resilience Initiative across Ovens Murray

### Consumer and community participation

- Build capacity across member organisations and community.

### Age-friendly communities

- Build capacity across member organisations and community.

### Monitoring and evaluation

- Build capacity across member organisations and community.

## Indicators

Members and communities will identify when, and to what extent, outcomes are achieved through engaging in participatory monitoring and evaluation processes.

## Outcomes

Health and wellbeing outcomes will be improved through utilisation of systems thinking, enabling innovative approaches.

Place-based approaches will be understood, valued and utilised across the catchment.

Cross-sector collaboration, community engagement and co-design will be enabled and strengthened.

Shared measurement, monitoring and evaluation for the development of meaningful outcomes data will be embedded.
